

## Depot Park Renovation Project

*Before*

The Depot Park Renovation Project began construction in October 2012. The renovations come as an effort to update the Town of Christiansburg's parks. This renovation was made possible through the F.Y. 2012-13 annual budget as well as local donations. Town crews will provide all labor for this project.

Renovation plans include:

- a multi-purpose athletic field (60x40 yards)
- a walking loop around the perimeter of the park (1/5 mile or appx. 1080 feet)
- additional playground equipment
- additional picnic tables in the wooded area of the park
- resealed and restriped basketball courts

Once the Depot Park Renovation is complete, residents and visitors may enjoy the updated amenities on offer at Depot Park!

### **Current Progress**

Town crews have leveled and top-soiled the multi-purpose athletic field. The field is ready to be seeded.

The portion of the walking trail on Town property has been graded and stone has been placed down. Paving of the walking trail will begin in Spring 2013.

Parking improvement plans are still in development. Approval of parking lot construction will be dependent on available funds. If approved, parking lot improvements are expected to be complete in the spring in conjunction with, or just prior to, trail paving.

*Town Crews leveling the multi-purpose field.*
